### *Interventional Pain Management Center at NMC*

Compassionate, Comprehensive  
Spine Care & Pain Management

Each patient is thoroughly evaluated and a personalized patient pain management plan is carefully designed.

We offer our patients two areas of interventional pain management:

- Diagnostic:** to identify what is generating the pain
- Therapeutic:** to relieve the pain for longer periods of time

Most procedures are done under fluoroscopic guidance in a minor procedure operating room in **The Knox Surgical Center** to insure your safety and comfort.

*Talk with your doctor about scheduling an appointment with Dr. Hanowell; or you may call for an appointment yourself: **770.385.4337.***
