

Meet the Orthopedic Surgeons at Newton Medical Center

Our orthopedic surgeons have the expertise and the experience you expect in handling minor orthopedic procedures to major total joint replacements and sports injury related conditions.

Among the many surgeries they perform are Total Hip and Knee Joint Replacement, Arthroscopy, ACL, and Rotator Cuff Repair in our state-of-the-art **Knox Surgical Center**.

Left to right: Jimmy Spivey, M.D., Scott Morrell, M.D., Bryan Parry, M.D., and Tom McElligott, M.D.

Computer-Assisted Navigation for Knee Replacement

Computer—Assisted Navigation for Knee Replacement is the latest advancement in orthopedic surgery that helps more accurately align a knee implant with a patient's specific anatomy.

Newton Medical Center is the only hospital in this area to offer the Stryker Navigation System for total knee replacements.
